

GRANT  
71N-46-CR  
177594  
P. 2

Final Report - NASA NAGW-359  
Chemistry of the Stratospheric and Tropospheric Gases/  
Interdisciplinary Symposia on Issues Relating to Global  
Biogeochemistry

The Interdisciplinary seminars on global change provided an important opportunity to scientists from the northeast to exchange information on current research activities. The seminars, which were hosted at Harvard, included regular participation from individuals at Columbia University, Brown University, Yale University, U. of Rhode Island, U. of New Hampshire, MIT, and GISS, among other institutions. Presentations were made also by internationally recognized experts from Europe, notably Professors Oeschger, Lorius, and Shackleton. The format, which included a formal talk and extended informal discussion was exceedingly successful. The grant also supported worked on related research carried out by a graduate student here at Harvard.

Enclosed is a list of seminar speakers along with a copy of papers published under the support of this grant.

(NASA-CR-193541) CHEMISTRY OF THE  
STRATOSPHERIC AND TROPOSPHERIC  
GASES/INTERDISCIPLINARY SYMPOSIA ON  
ISSUES RELATING TO GLOBAL  
BIOGEOCHEMISTRY Final Report,  
period ending 31 Dec. 1989  
(Harvard Univ.) 2 p

List of Invited Speakers for Climate Seminar Series "Interdisciplinary  
Symposia on Issues Relating to Global Biogeochemistry"

Professor John Imbrie March 6, 1985  
Brown University Providence Rhode Island

Professor Wallace Broecker April 17, 1985  
Columbia University, Palisades, New York

Professor Claude J. Lorius September 25, 1985  
Laboratoire De Glaciologie Et Geophysique  
De L'Environnement, FRANCE

Professor Edward Boyle, October 30, 1985  
MIT, Boston, Mass.

Professor H. Oeschger, November 20, 1985  
Universitat Berne, SWITZERLAND

Professor Nicholas Shackleton, December 18, 1985  
Godwin Laboratory  
ENGLAND
